AGILYSYS INFOGENESIS™ POS
TECHNOLOGY | INNOVATION | SOLUTIONS

Grow Your Business with POS Functionality that Never Quits

If you've ever struggled with your point-of-sale (POS) system, you know it can get in the way of serving guests and reaching your revenue goals. The dependability and capability of your POS system is paramount to creating and maintaining guest confidence. A dependable and feature-rich POS system gives you an edge against the competition, keeps transactions flowing, and ensures a seamless integration with your current back-office technologies without a large investment.

Extending Your POS Functionality

Agilysys InfoGenesis™ POS is designed to serve guests more effectively while improving your profitability. This flexible point-of-sale system is easy to set up and maintain, and its scalable architecture allows you to add workstations without having to build out expensive infrastructure. InfoGenesis POS integrates easily with a wide variety of other applications, including property management, inventory and procurement, self-service options, property activities and so much more.

Responsive and Reliable

Process transactions in your highest volume, most demanding business environments worldwide, with no loss of performance at the point of sale. InfoGenesis POS software provides industry-leading offline capabilities so you can deliver uninterrupted guest service even during intermittent network connectivity.

InfoGenesis Flex Offers POS Flexibility, Anywhere

InfoGenesis Flex offers state-of-the-art POS mobility with the same functionality as a stationary terminal on a variety of tablet options. Get your hands on the industry's most dependable, full-featured mobile experience

for foodservice operators and service staff. Use on a handy 8" tablet or leverage the 11" version as a sleek terminal that easily converts into a mobile solution for line busting or temporary portable scenarios. Because one size shouldn't fit all, select the tablet options that work best for you. No matter your choice, you get the full power of InfoGenesis POS in your waitstaff's hands so they can cover greater areas in less time, without ever losing touch with guests.

The Data You Need...When You Need It

On-demand reporting delivers the business insight you need to respond more quickly and effectively to operational challenges:

- Review spending patterns and capitalize on revenue opportunities.
- Understand where to cut costs and plan more effectively.

Receive the right information, faster than ever before. With the ability to customize data output, you can rest assured that you're seeing consistent numbers across your entire operation.

Streamline Your Operations

Item images on buttons make ordering fast and easy. Superior check management, along with consistent terminal configuration, pricing and screen setup, combine to give your frontline staff the tools they need to provide exceptional guest service across your entire organization.

Secure Your Payment Processing

Agilysys rGuest™ Pay Gateway is an innovative approach to safeguard your guests' payment data.

Reduce the risks, costs and compliance burdens by leveraging PCI-validated point-to-point encryption (P2PE) and tokenization with each transaction.

Features Summary

Apple Pay™	InfoGenesis offers the latest payment options in market.
Offline Capable	Take advantage of industry-leading, seamless transaction processing even when infrastructure goes down. Minimize customer and server impact, securing a high level of guest service and revenue flow with no downtime.
Integration with Agilysys rGuest™ Seat	An innovative reservations systems that facilitates information sharing for greater efficiency and personalized attention to guests. From those making the reservation to the hosts checking in the party to the servers - your staff is empowered to provide more memorable guest experiences.

Functional And Scalable For Data Storage Additions.	<p>Microsoft® Windows Server® 2008 R2</p> <p>Microsoft SQL Server® 2008 R2</p>

Safeguard Guest Data

*Your guests depend on you to keep their information safe.
Secure their trust by exceeding PCI Data Security Standards with rGuest™ Pay Gateway - integrated with InfoGenesis POS.*

Navigating today's changing landscape of secure, electronic payment processing doesn't have to be a challenge. rGuest Pay Gateway is the only valid solution - an industry-first, PCI-validated, secure payment processing gateway that meets your every need.

rGuest Pay – the new payment gateway standard:

- A full suite of credit card processing capabilities
- Industry-leading payment security through tokenization and P2PE
- Payment devices that support EMV and NFC transactions
- Integration with any application through a simple-to-use API
- Consolidated transaction reporting
- Comprehensive payment processor support

A Truly Secure Payment Gateway

There are four components to a robust security solution. InfoGenesis has them all in a single, integrated solution with rGuest Pay.

1. Tokenization - eliminating the storage of sensitive cardholder data.
2. PCI-validated P2PE - the only industry-approved method that prevents on-premise data loss.
3. Payment Information Proxy - adding greater protection for all your internet transactions.
4. EMV - preventing card-present fraudulent activity.

Industry Compliance

PA-DSS Validation

InfoGenesis POS has been validated and is compliant with the security benchmarks in the credit card industry's Payment Application Data Security Standard (PA-DSS).

PCI DSS Validation

Agilysys has attained and maintained its status as a PCI DSS Compliant Service Provider for its operations at the InfoGenesis data center.

SSAE No. 16 Type 2 Assessments

Agilysys also undergoes an annual Statement on Standards for Attestation Engagements, Number 16 (SSAE 16) assessment in order to ensure that our controls continue to meet the important needs of our customers.

Your Choice of Deployment

InfoGenesis POS is available as on-premise software or in a Software as a Service (SaaS) delivery model. Choose the delivery option that's best for your business. With SaaS, all of your outlets receive essential POS functionality through secure Internet connections to centralized servers at the state-of-the-art InfoGenesis data center. Agilysys has spent fifteen years perfecting the SaaS delivery model for POS, bringing you the following advantages:

- Earliest access to the latest and greatest features and capabilities as InfoGenesis SaaS is one of the first to receive patch updates and upgrades
- Server and software performance monitoring and health checks
- Full system backups
- System recovery
- Executable configuration and maintenance
- Online technical support with an extensive knowledge base
- 24x7 telephone technical support
- Access to customer account representatives and installation services

SaaS is ideal for organizations that want industry-leading technology, but may not have resources to invest in the staffing or infrastructure that supports an on-premise deployment. Reduce capital expenditures and focus on core business competencies by allowing Agilysys to attend to systems management.
